

They took my son from me on May 31 and they put him in an ice box and put me in another one. After that night I no longer knew about him, until 20 days later they gave me a call and on Tuesday I received another call. They took us to court with a judge and they chained us by the feet and the hands and they told us when we returned they would let us see our children, and it was all a lie because when we returned, our children were no longer there. We are doing very badly, we don't know what will happen. My son told me that they brought him Saturday and since then they haven't told him anything and he is very traumatized. Whenever we talk, he is crying. I don't know what to do. I need you to help us please, before things get more complicated. My son and I am from Guatemala.
